

A few updates from the Board

Road Sign Replacement:

The Road Name signs and posts will start being replaced on Monday. In preparation for this the old signs will be removed and laid down on Saturday for the vendor to Haul them off when setting the new posts. This will not effect the stop signs or other signs. Please be extra cautious when driving through the neighborhood during this time.

The damaged speed bumps on Hooper Creek will be repaired shortly, Eric Jackson will be handling this for us.

FEMA Clean-up Update:

Justin spoke to Chris Woods, (334) 540-3966. who is managing the cleanup, they will doing a final pass for vegetative debris pickup within the next week and he asked that we get any remaining debris to the side of the road ASAP.

There is a new federal program attached to FEMA to come and remove fallen trees, debris and root balls due to damage from Hurricane Helene. A resident verified this by going to Isothermal College in Columbus and sat with folks from USACE (Corp of engineers) it is a short running program - 90 days and it's already 60 days in. They will come, assess and then schedule to clean up downed trees and I believe even structures. All you need is IDs for property owners and a copy of your homeowners declaration page.

Please go to the college or this site for more details

Overgrown Ditches:

Please clean out culverts and ditches along the road in front of your property. If you need assistance with this, please let us know and we will have some volunteers reach out.

Community Work Days:

We will be organizing two community workdays, one to stain the Hooper Creek Fence and another to clear the overgrown ditches. More info to follow soon.

Event Sponsorship:

Are there any Businesses that you know of that would be willing to sponsor or donate toward community social events? There is one local business that

has come forward and we'd like to ensure that any resident owned ones have the same opportunity along with any other businesses.

Thank you,
The POA Board
